

SERVOTECH DT400 INDICATOR

Servotech's DT400 indicator is a versatile instrument designed to be used in rugged industrial environments where accuracy and reliability are major requirements. Powered by 2xAA batteries, this indicator features 13mm high LCD numerals making the indicator easily read from up to 10 meters.

The electronic components and indicator are housed in a waterproof stainless steel case making it suitable for use in food industries. A wide variety of sensor probes can be attached to meet the needs of any application - either direct mounting (Tri-clover, RJT or Running-nut) or with cable connections. A 4 - 20 mA output is also available as an option.

- 3-Wire PT100 RTD sensor input
- 10M visibility 3 1/2" digit LCD display
- High accuracy 0.1%
- Internal Battery 2AA > 1 Year Life
- Temperature Range -50 to 200°C
- Choice of probe design
- Surface, panel or direct mounting options

Rear Centre Entry

4-20mA Option
