APAQ C130^{RTD}

Digital 2-wire transmitter for Pt100 and Pt1000 with wireless communication

APAQ C130^{RTD} is a modern transmitter with high reliability and great performance. External influences such as ambient temperature, vibration, moisture and EMC interference have minimal influence on the measurement result, thanks to the robust design.

What characterizes APAQ C130^{RTD} is simplicity. You can easily configure the transmitters wirelessly via NFC with your smartphone or tablet. There is no need for expensive configuration tools or fixed workstations for transmitter configuration.

Measurements with Pt100 & Pt1000 sensors in 2-, 3-, 4-wire connection

APAQ C130^{RTD} accepts inputs from Pt100 & Pt1000 sensors in 2-, 3-, 4-wire connections acc. to IEC 60751 ($\alpha=0.00385$)

Temperature linear output

Fully temperature linear 4-20 mA output.

High accuracy

With an accuracy of $\pm 0,15$ K or $\pm 0,15$ % of span (the largest apply) APAQ C130^{RTD} offers an outstanding performance in its class.

Compact design for easy installation

The head-mounted variant is only 10.5 mm high and can easily be installed in all DIN B connection heads.

Reliable over time

Minimal drift of $\pm 0.05^\circ\text{C}$ or $\pm 0.05\%$ of span/ year reduces the need for calibration.

Designed for harsh conditions

Rugged design tested for 10 g vibrations.

Mounting, wiring and testing

APAQ C130^{RTD} is designed to fit inside connection heads type DIN B or larger. The large centre hole, dia. 7 mm / 0.28 inch, the robust terminals with test connections and the low height greatly simplify the mounting, wiring and testing procedure.

Wireless configuration

Configure APAQ C130^{RTD} wirelessly with your smartphone without power supply and cables

INOR Connect, easy-to-use app for configuration

The simple and user friendly app, INOR Connect, is used for transmitter configuration in seconds. All parameters are set in the app and then transferred to the transmitter via NFC.
