

# R12 Temperature Probes

Servotech's **R12 temperature probes** are flexible and robust constructed from 316L Stainless Steel housings and sheaths for strength and corrosion resistance.

These sensors include a 4 or 8-pin, M12 plug connector for easy assembly to patch cables or extension cables.

## Features

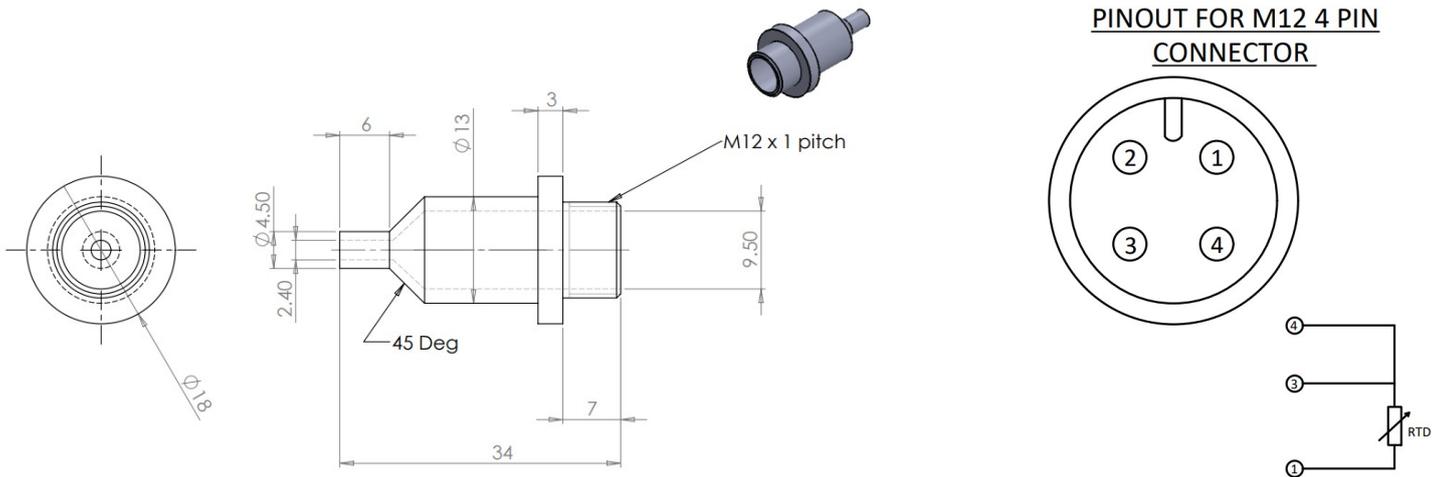

Operating Temperature Range

Standard = 0-260°C

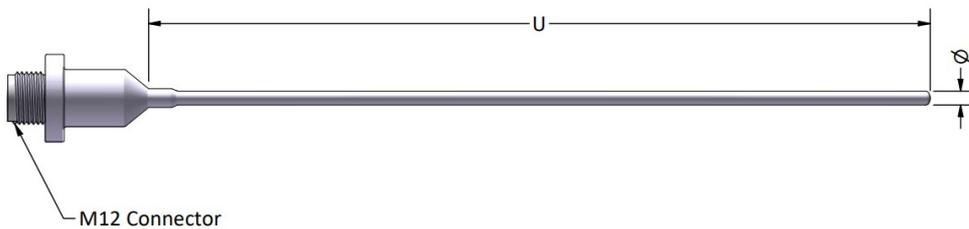

Low Temperature = -196 - 100°C

High Temperature = 0-600°C

- \* Available in Pt100 (Class A) | 1/10 DIN, Pt1000 | NTC
- \* Custom made to any Length (U) and Diameter\* (Ø)
- \* 316L Stainless Steel Housing
- \* M12 Male Connector
- \* Compression fittings available for installing into process

### Non-threaded housing option

U= Any length

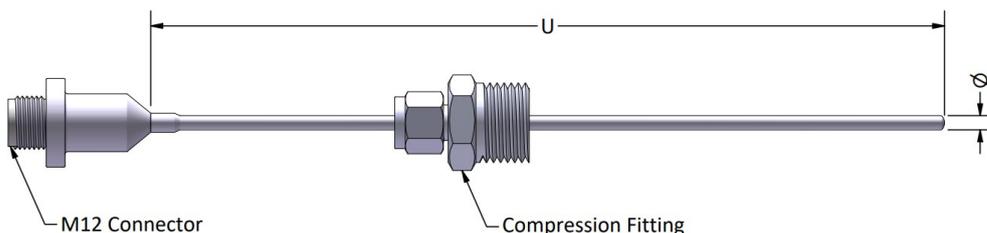

\*Ø =

- 3mm

- 4.5mm

- 6mm

### Compression fittings available for installation into threaded ports.

Other stem diameters available on request
